Regional Highly Infectious Disease Tabletop Exercises

Overview

Delta Development Group, in coordination with the PA Department of Health Bureau of Public Health Preparedness, is facilitating tabletop exercises throughout the Commonwealth that will focus on the Department's Novel Disease Concept of Operations Plan.

The tabletop exercises will center on managing the identification, treatment, and transfer of a highly infectious disease patient, with a focus on the stakeholder response at the local and regional levels.

The single day, four-hour tabletops will be offered in a variety of locations across Pennsylvania. **We highly recommend attending the tabletop scheduled in the Healthcare Coalition region where your organization or facility is located to get the most out of the exercise (see map below).**

Approval of Act 48/58 and EMS Continuing Education credits are pending.

**All regional Highly Infectious Disease response partners are invited and encouraged to attend!**

Registration

- To register for a tabletop exercise, click the appropriate link to the left.
- Information regarding specific locations can be found by clicking the appropriate link.
- When registering, please provide your name, email address, and organization.
- You will receive a confirmation email when your registration has processed.

Thank you for your participation!
